VISION AND MISSION

VISION

To ensure the social security effectively for the persons defined by the provisions of the labour law.

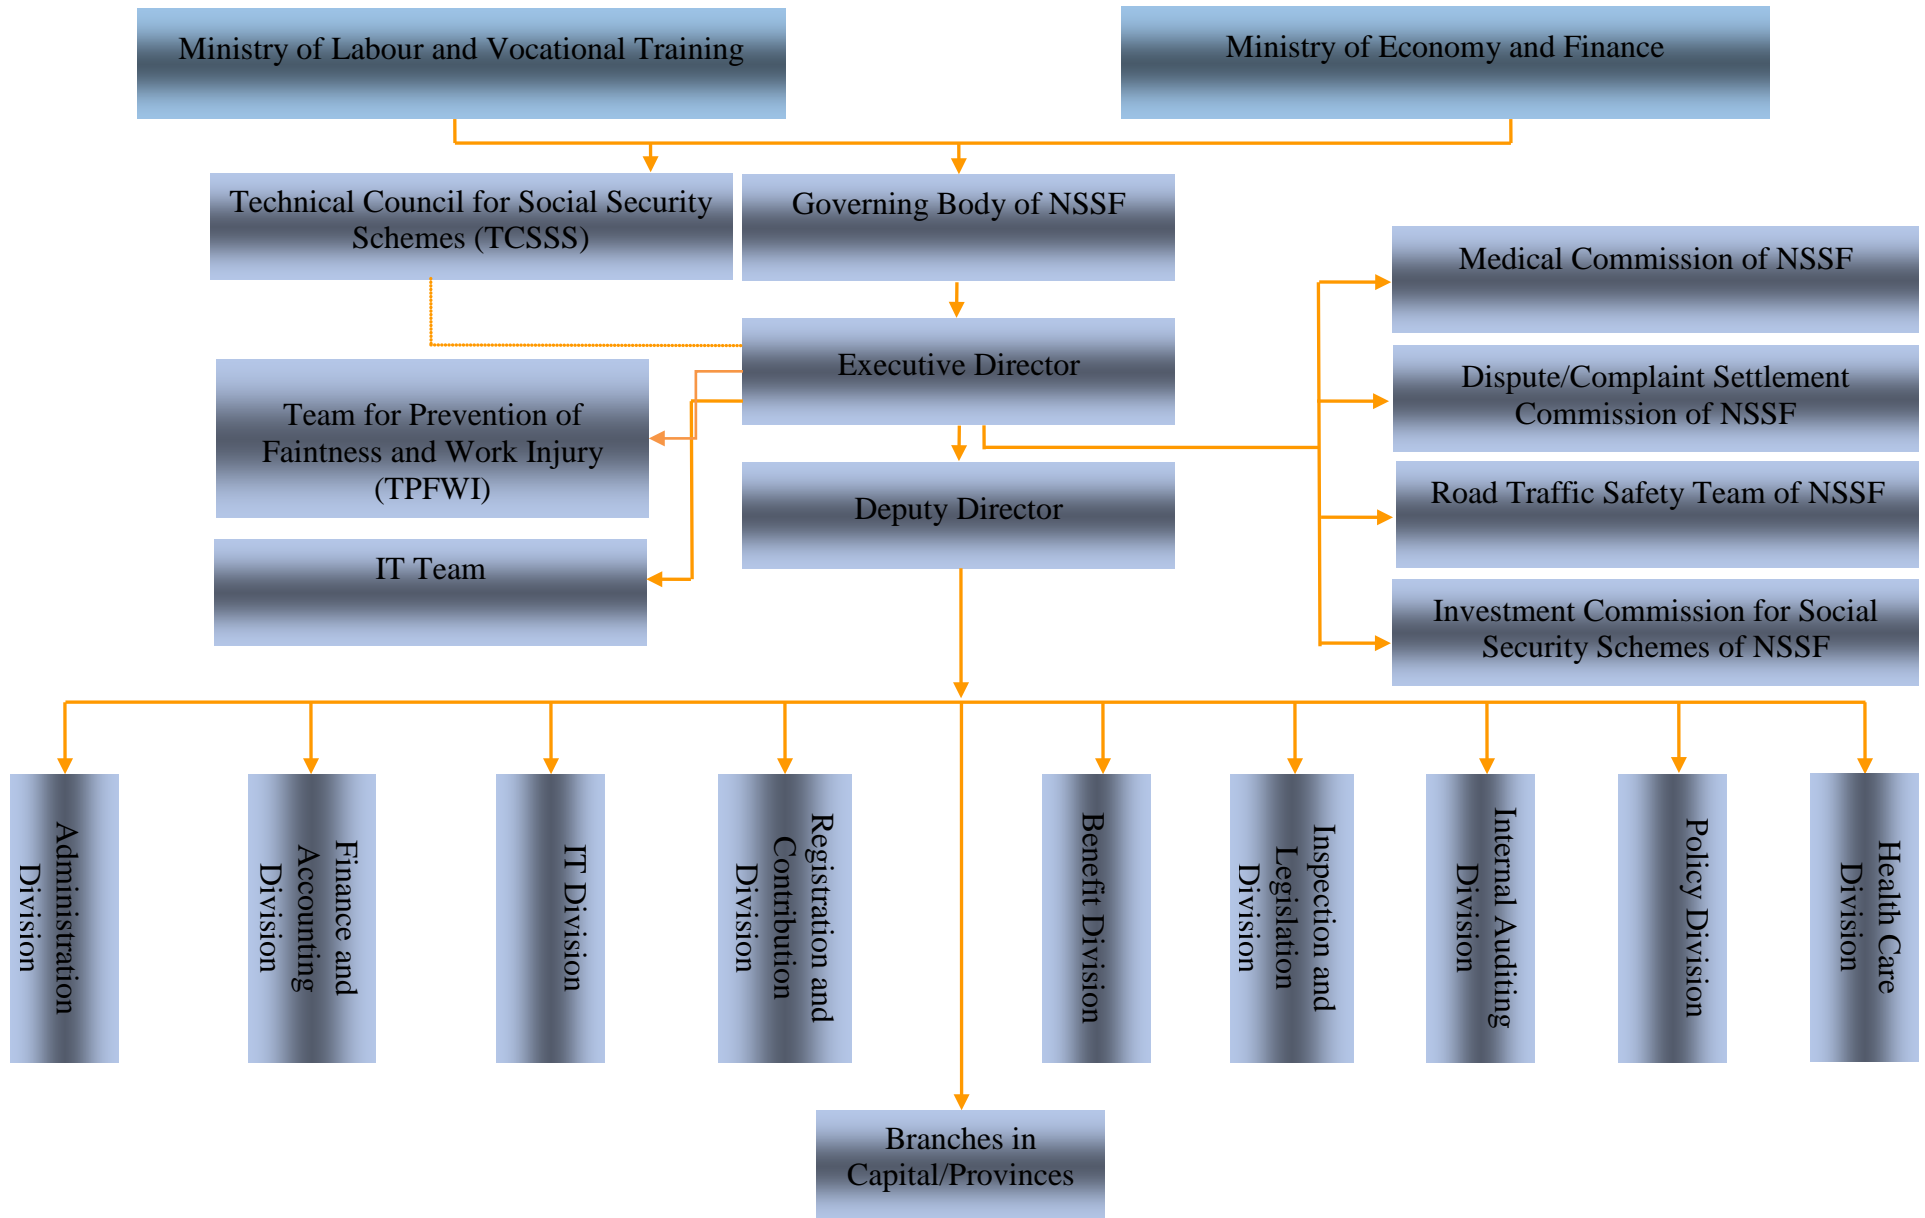

MISSION

To provide the social security services with effectiveness, transparency, accountability, and punctuality for persons defined by the provisions of the labour law with the aim of relieving hardships including old-age, invalidity, death, work injury, or other contingencies such as sickness and maternity.

OBJECTIVES

1. Strengthen and extend the implementation of Occupational Risk (workplace accident, commuting accident, and occupational disease)
2. Launch Health Care Scheme (medical care services, patient or victim referral service and corpse transportation, daily allowance, and health prevention services)
3. Launch Pension Scheme (old-age, invalidity, and death)

STRUCTURE OF THE NATIONAL SOCIAL SECURITY FUND (NSSF)

REPORT
ON
ANNUAL ACHIEVEMENTS 2016 AND ACTION PLANS 2017
OF THE NATIONAL SOCIAL SECURITY FUND (NSSF)

I. INTRODUCTION

The implementation of social security schemes on Occupational Risk, Health Care, and Pension shall be complied with the Law on Social Security Schemes for Persons Defined by the Provisions of the Labour Law and Sub-Decree on the Establishment of the National Social Security Fund in conformity with Rectangular Strategy, National Development Strategy, Social Protection Strategy for the Poor and Vulnerable, Vocational Training and Labour Sector Development Strategy, and Social Protection Strategy for Persons Defined by the Provisions of the Labour Law.

In accordance with the laws and action plans above, NSSF has implemented the social security schemes Phase I, Occupational Risk, by receiving the fruitful results and supports from the national and international organizations. Additionally, NSSF has been implementing the social security schemes Phase II, Health Care, in order to provide the benefits to workers in compliance with Sub-Decree No. 01 SD.E, dated 06 January 2016, concerning the Establishment of Social Security Schemes on Health Care for Persons Defined by the Provisions of the Labour Law.

For over 8 years, from 2008 to 2016, the successful implementation of the social security schemes Phase I, Occupational Risk, is another significant catalyst to help urge NSSF to experience potentially in order to establish the new schemes aimed at lightening the hardship of the social members, reducing the poverty of citizens, and promoting the social stability. With this success, NSSF has also found some challenges, both weaknesses and strengths, that are important experiences for improving the implementation of the social security scheme Phase I, Occupational Risk, and Phase II, Health Care, for the workers with the aim of promoting the health of workers as well as Phase III, Pension, with the purpose of promoting the human rights for the old people. These achievements are the national pride under the leadership and wisdom of **Samdech Akka Moha Sena Padei Techo Hun Sen** by establishing the schemes with a view to insuring the workers when reaching the old age and disability, enabling the workers to have entitlement to the medical care services, and also providing pension scheme to the workers like public employees.

NSSF strongly hopes that the annual achievements 2016 will become an effective tool for measuring, following up, and evaluating the implementation of social security sectors from persons defined by the provisions of the labour law and mirror the negative and positive points as well as other challenges to be adjusted and addressed in a bid to better design action plans.

II. Annual Achievements 2016

1. Strengthening and Extending the Implementation of Social Security Schemes on Occupational Risk

1.1. Registration and Contribution

All employers or owners of the enterprises/establishments under the scope of the law on Social Security Schemes for Persons Defined by the Provisions of the Labour Law shall be compulsory to register their own enterprises and pay contribution for Occupational Risk Scheme to NSSF. In the initial phase of NSSF, the registration of enterprises/establishments shall be implemented to the enterprises/establishments with 08 workers or more. The contribution rate of Occupational Risk Scheme is an agreeable rate determined 0.8 percent of the average wage in the classification of workers' monthly wage.

Figure 1: Activity of Registration and Contribution Payment in NSSF

1.1.1. Registration of Enterprises/Establishments

Since the initial implementation from November 2008 to 2016, NSSF has expanded the coverage of Occupational Risk Scheme nationwide and registered 8,731 enterprises/ establishments with 1,136,271 workers (798,027 females) equal to 70.23 percent.

Separately, in 2016, NSSF has registered the total number of 935 enterprises/ establishments with 59,192 workers (36,014 females) — 426 with 24,969 workers (14,425 females) in Phnom Penh and 509 with 34,223 workers (21,589 females) in provinces.

Remarkably, among these enterprises/establishments have not been operated until now, some reopened (some changed their names and replaced the employer). Most are handicrafts, brick kilns, restaurants and so on where are so distant from the crowded.

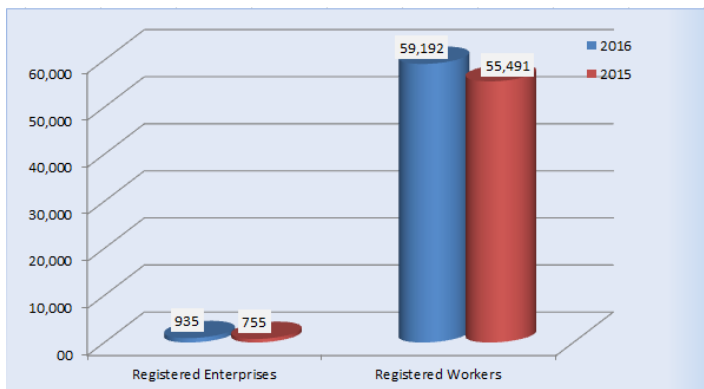

1.1.3. Comparison of Registration

Graph 3: Registration, 2015-2016

Based on this graph, there is an increase of 935 enterprises/establishments equal to 11.99 percent with 59,192 workers equal to 5.50 percent.

Graphic 4: Registration by Quarter 1, 2015-2016

Based on this graph, there is an increase of 180 enterprises/establishments equal to 23.84 percent with 3,701 workers equal to 6.67 percent.

1.1.5. Contribution

Among the total number of enterprises/establishments and workers registered in the National Social Security Fund, there are 6,618 contributory enterprises (5,416 enterprises with 1,042,143 workers (723,312 females) paid contribution equal to 81.83 percent comparable with the contributory enterprises) and workers paid contribution equal to 91.71 percent comparable with the total number of registered workers.

1.2. Inspection and Legal Affair

Inspection and legal affair play a vital role in ensuring the implementation of the law on Social Security Schemes for Persons Defined by the Provisions of the Labour Law and other regulations coming into force (existing effective legislations). This part focuses mainly on some works including explanation and guidance to the owners of enterprises/establishments regarding the policy implementation of social security schemes in order to urge them to register and pay contribution to NSSF, investigation of work injury, investigation of the survivors of victim, the law enforcement strengthening through inspection, sanction, penalty, and complaint to the court in case that enterprises/ establishments don't comply with the law.

The result of inspections in 2016 amounted to 4,233 times equal to 6,859 enterprises—12 enterprises were penalized.

1.2.1.2. Joint Inspection

Inspectors for social security schemes conducted the second ordinary inspection with the joint inspection group for 1,381 times equal to 1,381 enterprises—of these enterprises, there are 09 submitted the incorrect number of workers, 01 submitted the incorrect wage, 01 paid the contribution incorrectly, and 10 objected to the implementation of the NSSF. Since the middle of 2016, for the inspection in Phnom Penh, the inspectors for social security schemes have stopped their activities temporarily because they had to disseminate the social security schemes on Health Care in the enterprises/establishments in Phnom Penh and some provinces. Separately, for the

inspectors to the NSSF branches, they have still kept their works with the officials of Department of Labour and Vocational Training as usual.

1.2.1.5.2. Situation of Work Injury

NSSF received the work injury reports in which there are 36,734 victims. Of these victims, 35,157 victims were investigated—34,513 suffered from work injury comprising 24,902 workplace accident, 9,608 commuting accident, and 03 occupational disease respectively (03 victims suffered from occupational disease are considered as workplace accident) and 644 suffered from non-work injury (*the detailed data in table 12*).

1.2.1.5.3. Investigation of Entitlement to Survivors' Benefit

Investigation of Entitlement to Survivors' Benefit

2016	170	100	70
2015	186	106	80
Fluctuation (± %)	-8.60%	-5.66%	-12.50%

1.2.1.6. Legal Affair

NSSF fined 07 enterprises/establishments for registration, continued to follow up the legal procedures in case that 04 enterprises/establishments filed the complaint to the Phnom Penh Municipal Court and imposed a fine on 12 enterprises/establishments in relation to the submission of incorrect number of workers, declaration of inappropriate wage, failure to pay contribution, objection to the implementation of NSSF, and other penalties.

1.3. Benefit Provision

Even if the number of work injury kept increasing subsequently, NSSF prepared to develop the work formalities and extended the mechanism of benefit provision more conveniently and comprehensively in a bid to allow the workers suffered from work injury to have access services with efficiency and punctuality. Through these measures, NSSF established and operated the data management system of work injury benefit claims that can control the work injury reports,

investigations, and benefits calculation for accelerating the benefit provision with accuracy. NSSF also signed the agreement with 97 public and private health facilities near the workplace of the NSSF members and placed the agents in some health facilities in order to facilitate for the victims to access medical care services. Furthermore, in the case of serious work injury, NSSF designated the officials to go directly to the whereabouts of accidents in order to facilitate and intervene punctually.

1.3.1. Work Injury Report

In 2016, NSSF received the work injury reports from the enterprises/establishments in capital/provinces in which there are 33,116 cases with 36,734 victims (27,338 females). Through the result of work injury investigation amounted to 34,513 victims (25,683 females), there are workplace accident amounted to 24,902 victims (19,477 females), commuting accident 9,608 victims (6,204 females), and occupational disease 03 victims (02 females) respectively. For the degree of wound, there are 31,899 mild injuries (24,162 females), 2,446 serious injuries (1,461 females), 168 deaths (60 females), and 644 non-work injuries (488 females).

1.3.2. Comparison of Work Injury between 2016 and 2015

Graph 5. Number of the Registered Workers and Work Injuries (person)

According to the graph above, it unveils that for work injury in 2016, there are 34,513 victims, whereas in 2015 there are 30,281 victims; so, these numbers accumulates 4,232 victims equal to 13.98 percent. For the registered workers, there is an increase of 59,192 workers equal to 5.50 percent. We observe that work injury increases 13.98 percent, while the number of the registered workers increases 5.50 percent; so, if comparing with both increases, the number of work injuries increases the same as the number of the registered workers. For the rate of work injury, if comparing with the number of workers registered, it increases 3.04 percent in 2016 and 2.81 in 2015.

Graph 6. Work Injury by Type and by Degree of Wound (person)

In 2016, there is an increase in work injury consisting of workplace accident amounted to 2,415 victims equal to 10.74 percent, mild injury amounted to 4,095 victims equal to 14.72 percent, and serious injury amounted to 150 victims equal to 6.53 percent, whereas death decreased of 13 victims equal to 7.18 percent. For the commuting accident, there is an increase of 1,817 victims equal to 23.32 percent, while for the occupational disease, there is the same amount as in 2015. The growth of the occupational risk is in line with the increasing number of workers registered. *(Please see the data of the classification of occupational risk in Appendix 10)*

1.3.3. Claim of Occupational Risk Benefits

Through the 2016 benefit claims of occupational risk, based on Table 14, there is the total benefit claims of occupational risk amounted to 18,932 victims (13,255 females) equal to 31,974 claims, if compared with the 2015 benefit claims, there are 25,859 claims, thus there is an increase of 6,115 claims equal to 23.65 percent.

Table 14: Claim of Work Injury Benefits

Claim of Work Injury Benefits

8	Caretaker's benefit	45	26	+73.08%
9	Rehabilitation services	19	10	+90.00%
Total		36,508	28,472	+28.22%

Source: National Social Security Fund in 2016

Through the benefit claims of victims in 2016, depending on Table 16, NSSF issued the benefit awards to 19,262 workers equal to 36,508 claims for medical care benefit, temporary disability benefit, permanent disability benefit, survivors' benefits, funeral grant, and caretaker benefits amounted to 7,868,37 million riels. Meanwhile, NSSF also issued the benefit awards to 66 signed health facilities with 22,419 workers with 6,423.44 million riels and 47 non-contracted health facilities with 12,239 workers with 1,437.14 million riels as well as 19 workers accessed

rehabilitation services with 85.17 million riels. Therefore, the total benefit awards on cash and in-kind to the recognized and non-recognized health facilities and rehabilitation services for the year of 2016 amounted to 15,814.12 million riels.

Table 16: Expenditure by Type of Work Injury Benefits

No.	A. Type of Work Injury Benefits	2016 (million riels)	2015 (million riels)	Fluctuation (± %)
1	Medical care benefit	2,448.68	2,213.45	+10.63%
2	Nursing benefit	166.30	111.10	+49.68%
3	Temporary disability benefit	2,551.02	1,806.87	+41.18%
4	Benefit of permanent disability less than 20%	410.83	177.96	+130.86%
5	Benefit of permanent disability from 20% up to 100%	468.64	267.74	+75.03%
6	Survivors' benefit (pension)	668.00	720.00	-7.22%
7	Funeral grant	1,110.73	594.25	+86.91%
8	Caretaker's benefit	44.17	22.20	+98.94%
9	Rehabilitation services	85.17	41.18	+106.84%
Total (A)		7,953.54	5,954.76	+33.57%
No.	B. Type of Health Facilities	2016 (million riels)	2015 (million riels)	Fluctuation (± %)
1	Recognized health facility	6,423.44	5,014.70	+28.09%
2	None-recognized health facility	1,437.14	1,088.64	+32.01%
Total (B)		7,860.58	6,103.34	+28.79%
Grand Total (A+B)		15,814.12	12,058.10	+31.15%

Source: National Social Security Fund in 2016

The number of claimants and beneficiaries are not the same because some documents leave from the previous year and are kept for the following year. The expenditure of the 2016 benefit provision raises 3,756.02 million riels equal to 31.15 percent. The growth of claiming and providing benefits is due to the increase in work injury in line with growth of workers registered.

1.3.5. Evaluation of the Degree of Permanent Disability

Medical Committee has implemented its own duties with transparency, justice, and professional conscience and built trust with the general organizations and the NSSF members, particularly with employers or owners of enterprises/establishments, in the implementation of NSSF through contribution payment for occupational risk scheme for the workers as well as urged them to submit the correct number of workers and workers' wage in order to avoid the loss of benefits as set forth in the law and regulations.

Table 17: Evaluation of the Degree of Permanent Disability

Evaluation of the Degree of Permanent Disability					
Description	Meeting (time)	Less than 20%		From 20% up	
		Total	Woman	Total	Woman
2016	23	69	23	128	59
2015	13	31	16	46	15
Fluctuation (± %)	+76.92%	+122.58%	+43.75%	+178.26%	+293.33%

There are 128 victims received the permanent disability benefit more than 20%. Of these victims, NSSF granted the rehabilitation services and caretaker benefits to 8 victims (3 females).

1.4. Preparation of Rehabilitation Services

In virtue of the Law on Social Security Schemes for Persons Defined by the Provisions of the Labour Law, Sub-Decree concerning the Establishment of the National Social Security Fund, and Prakas on Occupational Risk Benefits, the workers suffered from work injury leading to the permanent disability are entitled to receive rehabilitation services (prosthetics and orthotics) prescribed by the official medical doctors recognized by NSSF as well as occupational rehabilitation and vocational training services. For the above service provision, NSSF, so far, has not yet provided completely; most of them are the medical rehabilitation services including prosthetics and orthotics and physiotherapy. Separately, some medical rehabilitation services, occupational rehabilitation and vocational training, and other social rehabilitations have not been provided yet.

As the result in 2016 for providing rehabilitation services above, Working Group for Mechanism Preparation of Rehabilitation Service Provision implemented as follows:

- Design flow chart, notification, claim form, referral letter for people with disability, report form retrieved from system, and evaluation form for following up the service provision;
- Prepare draft Prakas on Rehabilitation Services for the Employment Injury Insurance Scheme;
- Prepare formalities and procedures for providing rehabilitation services;
- Collaborate with the Information Technology Division in a bid to establish data management system for the disabled and the rehabilitation service provision of NSSF.
- Phone to ask the health of workers and collect information from workers, the NSSF member, suffered from work injury leading to the permanent disability with a view to facilitating to provide the rehabilitation services and benefits in common;
- Collaborate with the Benefit Division to conduct the study visit in the Rehabilitation Center for 11 times, Vocational Training Center for 01 time, and Rehabilitation Service Company for 01 time;
- Collaborate with the Health Care Division to evaluate the degree of disability and follow up directly the provision of rehabilitation services to 76 NSSF members;
- Collaborate with the Rehabilitation Center for the Patient with Spinal Cord Injury in Battambang province to examine the workers suffered from work injury resulting in spinal cord injury and in capital/provinces and provide the rehabilitation services on spinal cord to 04 workers.

- Collaborate with the Bontey Preab Vocational Training Center for the People with Disability to offer the training course to 05 NSSF members.;
- Collaborate with the Benefit Division and Policy Division to examine the worker's injury and provide the rehabilitation services to 29 members;
- Convene the meeting with People with Disability Fund (PDF), Exceed Company, and Kean Klang Rehabilitation Center to find out the rehabilitation consumption and discuss to design the guidelines of Memorandum of Understanding (MoU) for accessing services;
- Collaborate to make the discharge report on the consumption of medical care services for employment injury insurance scheme;
- Study and file the legal documents and strategies in relation to the rehabilitation service provision of NSSF of Cambodia and international institutions;
- Providing rehabilitation services amounted to 12 cases (08 cases to victims, 02 cases to vocational training center, and 02 cases to hospital);
- Establish the decision on the Revision of Composition of Team for Mechanism Preparation of Rehabilitation Service Provision and the decision on the Job Delegation to the Officials and Contracted Staff of Team for Mechanism Preparation of Rehabilitation Service Provision;
- File the information obtained from the ministries, institutions, centers, organizations, and private companies providing the rehabilitation services.

2. Launching the Social Security Schemes on Health Care

❖ The National Social Security Fund finished the Health Insurance Project (HIP) of GRET organization that this pilot project covers the medical care and victim referral services by the end of March 2016. In Health Insurance Project (HIP) for the workers, there are 11 registered factories with 6,312 workers (5,681 females), on average, accessed services amounted 2,224 times within the last 04 months.

No.	Type of Service Consumers in Health Insurance Project (HIP)	Service Consumer (time)		
		2016	2015	Fluctuation (± %)
1	IPD	120	417	-71.22%
2	OPD	2,049	10,822	-81.07%
3	Birth Delivery	34	121	-71.90%
4	Abortion	21	106	-80.19%
Total		2,224	11,466	-80.60%

Source: National Social Security Fund in 2016

2.1. Registration and Contribution

2.1.1. Registration (Identification of Workers)

Referring to Prakas No. 093 LV/PrK., dated 07 March 2016, on the Determination of Phases and Date of the Implementation of Social Security Schemes on Health Care and the Notification No. 127 LV/N, dated 02 May 2016, on the Registration of Workers in the National Social Security Fund, NSSF determined the implementation starting from the enterprises/establishments under the scope of Phnom Penh, Kandal province, Kampong Speu province, and reach subsequently other provinces depending on the actual technical and geographical situations.

NSSF renewed the registration of workers by December in 2016 that there are 603 enterprises/establishments with 600,831 workers (504,456 females).

Table 19: Renewing the Registration of Workers

Description	Renewing the Registration of Workers								
	Total			Capital (Phnom Pneh)			Provinces		
	Enterprise	Member	Woman	Enterprise	Member	Woman	Enterprise	Member	Woman
By December in 2016	603	600,831	504,456	390	374,008	305,309	213	226,823	199,147
Update of the Number of Enterprises and Workers in 2016	6,884	1,108,759	752,459	3,832	611,064	396,987	3,052	497,695	355,472
Percentage (%)	8.76%	54.19%	67.04%	10.18%	61.21%	76.91%	6.98%	45.57%	56.02%

Table 20: Registration of Workers comparable with Garment and Footwear Enterprises/Establishments

Description	Total			Capital (Phnom Pneh)			Provinces		
	Enterprise	Member	Woman	Enterprise	Member	Woman	Enterprise	Member	Woman
By December in 2016	603	600,831	504,456	390	374,008	305,309	213	226,823	199,147
Update of the Number of Enterprises and Workers in 2016	1,006	687,686	566,645	646	362,001	298,371	360	325,685	268,274
Percentage (%)	59.94%	87.37%	89.03%	60.37%	103.32%	102.33%	59.17%	69.64%	74.23%

According to Table 19, the comparison between re-determining registration of workers and updating the registered enterprises/establishments contains 8.78 percent. Separately, based on Table 20, the comparison between re-determining the registration of workers and updating the garment and footwear manufacturing enterprises/establishments shows that the result of re-determining the registration of workers is 59.94 percent.

2.1.2. Contribution

Referring to Prakas No. 220 LV/PrK., dated 13 May 2016, on the Determination of Contribution Rate and Formalities of Contribution Payment for Health Care Scheme, NSSF will issue the letter to impose liability of contribution payment on the enterprises/establishments and workers as from September in 2016 onwards.

All employers or owners of enterprises/establishments are compulsory to collect and pay contribution to NSSF. Contribution rate of employers or owners of enterprises/establishments is equal to 1.3 (one point three) percent and of workers is equal to 1.3 (one point three) percent of average wage in the classification of workers' monthly wage.

In 2016, NSSF imposed liability of contribution payment on 345 enterprises/establishments; of these enterprises/establishments, there are 312 enterprises/establishments paid contribution with 282,727 workers (235,050 females).

Table 21: Number of Enterprises/Establishments and Workers Paid Contribution

2.2. Inspection and Legal Affair

- Collaborate to guide and explain the formalities and procedures of renewing the registration of enterprises/establishments and workers.
- Collaborate to guide and explain the health care benefits and contribution payment.
- Collaborate to distribute the contributory notification letter to the non-registered enterprises/establishments.
- Facilitate the dissemination of NSSF's implementation in the enterprises/establishments in Phnom Penh and some provinces. Consequently, there are 547 enterprises/establishments facilitated to publish the implementation of NSSF in Phnom Penh and some provinces in 2016.

2.3. Benefit Provision

To allow the workers to access services in the health facility near their workplace and housing, in this circumstance, NSSF has expanded to sign the agreement with health facilities throughout capital/provinces; by December in 2016, there are 783 health facilities comprising 03 national hospitals, 100 referral hospitals, and 680 health centers.

There are 17,045 members (15,047 females) accessed health care services from 01 November to 30 December 2016; of these, there are 16,063 workers (14,650 females) have

entitlement to access services and 982 workers (397 females) are not entitled to access services (because they did not satisfy the conditions).

3. Urging to Prepare and Launch the Social Security Schemes on Pension

The preparation to establish pension scheme for workers in private sector highlights the effort of the Royal Government for the future of current active labour force and the participation in promoting labour productivity because through this mechanism the workers, active labour force, will feel warm for their future although they are working in the private sector, they have possibility to live by themselves when they reach old-age without depending fully on their children. This is a part to promote the human rights for the old people.

For this pension scheme, the NSSF leaders decided to launch in 2017. Nowadays, the team has been preparing and studying the legal instruments that reach to prepare the feasibility to launch this scheme as expected with no any impacts.

4. Supporting the Implementation

4.1. Preparation of Policies and Legal Instruments

The growth of work scope, number of members, situation of socio-economic growth, and demand of public service provision for the citizens, in whole and part for the workers working in the enterprises/establishment, in 2016, NSSF has strived twice to fulfill its works by designing to strengthen, extend, and develop the policies of social security schemes through preparing the profound long-term plans and establishing the legal instruments for the implementation basis in order to ensure the provision of social security services with effectiveness, punctuality, and response to the need. The meetings of Governing Body were convened for 10 times (26, 27, 28, 29, 30, 31, 32, 33, 34, and 35) of the third mandate and for this fourth mandate, the meetings were held for 03 times that both tutelary ministries checked and approved as follows:

Figure 2. The Second Meeting of the Governing Body of NSSF, 02 November 2016

- Report on Annual Achievements 2015 and Action Plans as well as the plan to launch health care scheme of NSSF.
- Draft Prakas on the Determination of Phases and Dated of Implementation of Social Security Schemes on Health Care.
- Draft Prakas on Health Care Benefits.
- Draft Prakas on the Determination of Contribution Rate and Formalities of Contribution Payment for Health Care.
- Joint Prakas on Provider Payment Methods for Health Care.

- Inter-Ministerial Prakas on the Agreement of Health Care Service Consumption and Provision between the National Social Security Fund and Health Facility for Health Care.
- Report on Income Statement 2015 of the National Social Security Fund.
- Draft Prakas on List of Chronic Diseases.
- Draft Plan on Income Statement 2017 of NSSF.
- Adjustment of ceiling rate of contribution payment.
- Report on 9-Month Achievements of TPFWI and RTSTWP.

4.2. Management and Human Resource Training

4.2.1. Administration and Finance

4.2.1.1. Administration

Administration plays a vital role in administrating documents, supplies, and management of officials and contracted staff in a bid to ensure the practice of the internal regulation with efficiency and in compliance with the law on Common Statute of Civil Servants of the Kingdom of Cambodia and the high effectiveness of work.

In 2016, the NSSF administration achieved as follows:

- Get 782 receive letters
- Distribute 1,180 send letters
- Prepare the payment of salary and other perquisites for officials and contracted staff starting from December 2015 to November 2016.
- Prepare to pay contribution of occupational risk for 605 contracted staff in 2016
- Adjust the salary of Mr. Hat Teanbourein in the incentive list.
- Increase salary scale and perquisite for 06 officials of NSSF.
- Prepare to request for the recruitment of 50 contracted staff to the National Social Security Fund (head office) for registering new members.
- Allocate 145 probationary staff to the central office and provincial branches—Prey Veng, Battambang, Kampot, Koh Kong, Banteay Meanchey, Pailen, Pursat, Kampong Speu, and Svay Rieng.
- Nominate 74 probationary staff as contracted staffs to the central office and provincial branches—Battambang, Kampong Thom, Siem Reap, Prey Veng, Takeo, Rathanakiri, Kampong Chhnang, and Kratie.
- Renew one-year contract with 82 contracted staff to the central office and provincial branches—Pursat, Kampot, Takeo, Sihanuk Ville,

Kampong Chhnang, Svay Rieng, Banteay Meanchey, Koh Kong, Kampong Thom, Siem Reap, Odor Meanchey, Pailen, Mondolkiri, Prey Veng, Kampong Cham, Rathanakiri, Kratie, and Kandal.

- Increase salary scale and perquisites for 18 contracted staff working for 02 years in NSSF.
- Organize the meeting on evaluation of 62 probationary staff in order to renew them to be one-year contracted staff of NSSF.
- Pay the rental building fee and utility bills for provincial branches.

4.2.1.2. Finance

Accounting and financial works of NSSF are operated completely through bank system; it means that all managements of income statement including contribution collection from enterprises/establishments, fine payment, benefit in payment for workers suffered from work injury, and administration expense, shall be performed through bank system with the aim of ensuring effectiveness and accountability. For its implementation, NSSF has applied the following major works:

- Design the income statement plans for the following year (action plans)
- Prepare the monthly income statement in 2016.
- Record the monthly contribution collected from all the enterprises/establishments in account receivable.
- Record the daily cost in journal entry.
- Record the monthly cost of reimbursement for service providers and of pension benefits for the NSSF members in account payable.
- Prepare the exchange rate for monthly contribution payment.
- Check other expenses such as mission, administration, occupational risk prevention, and benefit provision.
- Prepare tax payment on salary.
- Prepare the monthly payroll ledger.
- Verify the bank slip with cash book.

4.2.2. Cooperation and Human Resource Training

Cooperation and human resource training play an important role in developing the organization and strengthening the cooperation between stakeholders and development partners both in local and international in order to ensure continuity of the implementation of organization for preparing plans, formalities, and procedures, developing knowledge, and exchanging new experiences. The cooperation and human resource training also contributed to develop the entire social activities that the leaders, especially the NSSF officials, attended the meeting, workshop, training course, and study visit both in local and international as follows:

4.2.2.1. Domestic Affair

With the cooperation and human resource training in the country, NSSF has prepared the training courses and updated annually the internal works for officials and contracted staff. The leaders, officials, and contracted staff of NSSF have arranged and participated in the meeting on Action Plan Preparation and workshop on Promotion of the Awareness in the ministries, organizations, and relevant institutions nationwide for many time as follows:

- Prepare the internal training course on Update of Inspection and Health Care Awareness for officials and contracted staff in 23 provinces and 02 districts in Phnom Penh.
- Arrange the internal training course on Update of Procedures for Registration and Contribution Payment for Health Care Scheme for officials and contracted staff in 23 provinces and 02 districts in Phnom Penh.
- Prepare the dissemination meeting of Inter-ministerial Prakas on Provider Payment Methods and Agreement of Health Care Service Consumption and Provision between the National Social Security Fund and Health Facility for Health Care Scheme.
- Participate in the workshop on the 2016 Expenditure in the Ministry of Labour and Vocational Training.
- Participate in the workshop on Guidelines of Accounting Works for Public Administration Enterprises in the Ministry of Economy and Finance.
- Participate in the workshop on Pension Financing in Ministry of Economy and Finance.
- Participate in the workshop on Progress of the Implementation of Financial Development Strategy 2016-2025 in the National Bank of Cambodia.
- Participate in the workshop on Social Health Insurance for the Citizen in the Foreign Economy in the Phnom Penh Hotel.
- Participate in the workshop on Draft Law on Trade Union in the National Assembly.
- Participate in the dissemination workshop on Implementation of Social Security Schemes on Health Care in the Phnom Penh Hotel.
- Participate in workshop on Evaluation of Capacity and Action Plan Building 2016 of GIZ in the Imperial Garden Villa.
- Participate in the workshop on the First-Quarter Achievements of the Enforcement on Traffic Law in the Ministry of Public Works and Transportation.
- Participate in the workshop on the Draft of National Guidelines, Benefit Package, and Service Payment Methods for Equity Fund in the Sunway Hotel, Phnom Penh.

- Participate in the tripartite national workshop on Decent Labour Program 2016-2018 of Cambodia in the Phnom Penh Hotel.
- Participate in the workshop on the Promotion of Industrial Relations of Cambodia in the Phnom Penh Hotel.
- Participate in the training course on Procedures of Occupational Risk Benefit Provision and Facilitation in the Hospital—there are 12 officials and 33 contracted staff.
- Participate in the workshop on the Preparation of Program Budget Plans 2017 in the Ministry of Labour and Vocational Training.
- Participate in the training course on PQI, Quality Strengthening, and Work Productivity in the Ministry of Labour and Vocational Training.
- Participate in the training course on Strengthening the Capacity of Gender Focal-Point Trainer in all organizations under the Ministry of Labour and Vocational Training.
- Participate in the national capacity building workshop on the Preparation of Action Plans, Awareness of Benefit Claim Procedures, Budget Program in 2017 and the implementation of the national policy on Career and Employment 2015-2025 under cooperation of ILO in the Phnom Penh Hotel.
- Participate in the training course on Crisis Management and Disaster Risk Reduction in the Singapore-Cambodia Center.
- Participate in the second workshop on Health Study in Cambodia in the Himavari Hotel.
- Participate in the workshop on Bong Market Development in Emerging East Asia in the Le Royal Raffle Hotel.
- Participate in the tripartite national workshop on Minimum Wage of Cambodia in the Phnom Penh Hotel.
- Participate in the training course on Reviewing Draft Laws and Legal Instruments for Good Governance, Positive Changes, and Dispute/Complaint Settlement out of Court System with Effectiveness in the Ministry of Labour and Vocational Training.
- Participate in the training course for focal-point trainer on Prevention of Faintness and Work Injury in the Khan Sen Sok meeting room.
- Participate in the meeting and prepare the training course for focal-point trainer and dissemination team referring to Decision No. 02 S-LSC, dated 11 September 2016, on the Establishment of Team for Strengthening the Policy Implementation of Labour Sector Development in the NSSF Grand Room.

- Participate in the workshop on Preparation of Legal Framework of Social Protection System in the SUNWAY Hotel.
- Participate in the dissemination workshop on Air Pollution Forecasting System for the Enterprises/Establishments in the SOKHA Hotel.
- Participate in the workshop on Data Analysis Tool of Investment on Reproductive Health and Family Plans in the Cambodiana Hotel.
- Participate in the dissemination workshop on Report of Cost Estimation for Health Insurance Project of Cambodia 2012-2014.
- Participate in the workshop on Draft Prakas on Working Conditions for the Maid in the SUNWAY Hotel.
- Participate in the workshop on Draft Sub-Decree on Small-Scale Insurance in the Phnom Penh Hotel.
- Participate in the workshop on Pension Scheme in the Rock Royal Hotel.
- Participate in the first workshop on Draft Guidelines of Infirmary Preparation in the Enterprises/Establishments in the Phnom Penh Hotel.
- Participate in the workshop on Administration, Staff, and Plans in the Ministry of Labour and Vocational Training.
- Participate in the second workshop on Draft Prakas on Working Conditions for the Maid in the Phnom Penh Hotel.
- Participate in the workshop on the Awareness of Social Protection in Tonle Bassac II.
- Participate in the dissemination workshop on Draft Prakas on Procedures of Excise and Advance Expenditure for the Public Administration Enterprises in the Ministry of Labour and Vocational Training.
- Participate in the workshop on Improving the Efficiency of Health and Disease Spending with an Emphasis on the Role of Health Financing in the Phnom Penh Hotel.
- Participate in the workshop in Purchasing to round out the Overall Materials on three Health Financing, Re-Insurance, and Provider Payment Mechanism in the SOKHA Hotel, Siem Reap province.

Apart from the above works, NSSF also nominated the officials and contracted staff to join the social activities for many times with the purpose of contributing to the whole social development.

4.2.2.2. Foreign Affair

Aside from the promotion of human resource and cooperation in the country, the international relation plays a vital role in promoting the cooperation with the international

development partners and the integration of social security sectors of Cambodia in the region with the aim of exchanging new technical experiences for developing the country. In 2016, NSSF fulfill the main foreign affairs for social security sector as follows:

- Participate in the workshop on the Investment of the National Social Security Fund, Kuala Lumpur, Malaysia.
- Participate in the study visit on the Universal Social Protection, Japan.
- Participate in the workshop on Social Health System, Bangkok, Thailand.
- Participate in the workshop on the Social Security Schemes, Cebu, Philippine.
- Participate in the workshop on Capacity Building Program on the Information Technology for the Management of Employment Injury Insurance, Seoul, the Republic of Korea.
- Participate in the program on the Leadership for the Universal Health Service Coverage prepared by GIZ and World Bank, Cebu, Philippine.
- Participate in the international training course on the Rehabilitation Services for the Workers with Permanent Disability, Thailand.
- Participate in the training course on Health Insurance Scheme, Republic of Korea.
- Participate in the training course on the Leadership for the Universal Health Service Coverage prepared by GIZ and World Bank, Malaysia.
- Participate in the training course on the Social Security, Malaysia.
- Participate in the 33rd ASSA Meeting of Governing Board, Philippine.
- Participate in the workshop on the Investment of the National Social Security Fund, Manila, Philippine.
- Participate in the bilateral regional workshop of World Health Organization on the Financing Policy for Health Service in Asia, Manila, Philippine.
- Participate in the workshop on the Universal Social Protection through tripartite cooperation between the developing countries, Beijing, People's Republic of China.
- Participate in the study visit on Staff Identification, Japan.
- Participate in the workshop on the Employment Injury Insurance Scheme, Republic of Korea.
- Participate in the universal conference on Work Injury Compensation Payment in Asia, Malaysia.

- Participate in the workshop on the Potential of Social Protection for Increasing the Adaptation to Hazards, Philippine.
- Participate in the training course on Cost Computerization Model of Pension Scheme for Public Employees, Australia.

4.2.3. Information Technology

NSSF designed the applications and data managements through the information technology for registration, contribution payment, benefit provision, attendant system of officials, and other crucial works. Visibly, in 2016, NSSF accomplished the following works:

4.2.3.1. Programming

Program retrieves data from and inserts data into Sage Accpac (NSSF Sage):

- Develop the NSSF Sage program to retrieve the contribution income and create form of General Ledger to retrieve cost of benefit and Health Care Scheme.
- Create form of Account Receivable to retrieve the contribution income.
- Backup database NSDATE and database NSSYS and then restore both databases to create the database for testing Sage Accpac and NSSF Sage as well as install Sage Accpac in the server test machine and client machines for testing with the accounting division.

Program publishes the NSSF member card:

- Update form for inserting the name of members received member card and form for publishing the NSSF member card in order to accelerate the publishing.
- Create form for correcting the wrong information of new members.

Program retrieves data as CSV file for HSPIS:

- Update form for retrieving data as CSV file by adding function of retrieving the data of member for inserting member list with wage into the existing list.
- Add function of retrieving the data of enterprises/establishments registered in Health Care Scheme from registration and contribution programs into HSPIS.

Program retrieves data of contribution payment through ACLEDA Unity System: add function for calculating the number of workers who pay contribution in the following month.

Program identifies the NSSF member:

- Create form of Server Application and Client Application.

- Delete data and retrieve data (such as name of member and number of enterprises/establishments) from Registration and Contribution Division in order to insert it into database.
- Create new account for new members in the Registration and Contribution Division.
- All server machines are equipped with new database and all client machines are installed new registration program.
- Create form for inserting the information of enterprises/establishments registered newly in the system.
- Create form for retrieving data as File Access based on enterprise code and data-inserted date.

Program manages the NSSF rehabilitation:

- Create database for storing and retrieving data of victims with permanent disability more than 20%.
- Adjust the flowchart based on the request of rehabilitation service access, report for requesting for accessing rehabilitation services, form of degree of permanent disability, and form of the report for reporting rehabilitation services.
- Install the rehabilitation program and database in the server testing machine so that the team can test.
- Update form of work injury and disability information and form of medical care service and rehabilitation service access history.

Program manages the NSSF benefits:

- Update program for reimbursing of medical care cost, program for adjusting form of attach letter, program for submitting the occupation risk report, and program on NSSF Benefits for using the NSSF member card with 15 digits.
- Facilitate use of the NSSF benefit program in the central office and all NSSF branches.
- Study to create the table for storing data of persons gaining permanent benefit and create the form for inserting and retrieving data of persons gaining permanent pension.
- Create the form for calculating annual permanent disability benefit in line with the annual average inflation.
- Create the form for publishing the error report on the investigation result of the NSSF branches.
- Create the forms for publishing envelop, list of beneficiary, and re-decision.

- Update the semester, quarter, and monthly reports of persons with permanent disability based on the entitlement conditions.
- Update the benefit program by adding the forms for inserting the occupational risk report connected the central office with the NSSF branches, medical care cost report of non-recognized health facilities and permanent benefit report by retrieving additional inflation automatically.
- Create the table for storing data and form for inserting data of beneficiaries receiving survivors' benefit.
- Create other forms of report in accordance with necessary needs of divisions.

Program manages registration and contribution:

- Update the form of contribution payment and create the form for closing annual report and other some reports.
- Add the form for registering the new NSSF member together with data management system of registration and contribution program and create the program for testing the procedures of contribution payment for health care scheme for the registration and contribution division.
- Prepare the reports of number of workers based on their current address and verified by the fingerprint system.
- Update the form for publishing the NSSF member card, form for inserting the NSSF membership code, and form for inserting the monthly wage of workers for occupational risk scheme.
- Prepare to separately create the program for publishing the new NSSF member card from the registration and contribution program.
- Update the form for verifying the NSSF member code presented in the worker list that is incorrect in the previous month and form for inserting the monthly wage of workers and add the function for verifying the fingerprint system in the form for inserting the data of new workers in the duplicate data system.
- Create other forms of report in line with necessary needs of divisions.

Program manages the NSSF administration: update the form for calculating overtime wage, form for inserting monthly wage, and form for calculating the yearly, monthly, daily attendance by skipping the already-calculated name.

Program manages the NSSF website application:

- Add the form for calculating the amount of contribution for health care scheme.

- Determine the function of program use for occupational risk and health care schemes in the same program.
- Create the form for verifying name and code of consumer before transferring E-Form files into server machine.
- Create the form for clearing all data of workers only one time from E-Form file.
- Adjust some errors related to the retrieval of data of workers who are renewed the registration.

The NSSF Program:

- Design the NSSF program for health care scheme so that the enterprises/ establishments can retrieve the documents from the NSSF website and the clip will be presented how to use this program.
- Update the form for declaring the resigned workers to be used more conveniently and retrieved the already-declared resignation file in order to add the new resigned workers.

Program manages the recruitment:

- Create database system for storing the data of examination subject, form for inserting questionnaire and answers and form for registering the candidates.
- Create the form for registering the candidate, determine the period of examination by subject, create the report for releasing the score of each candidate by subject, and rank the candidate by score.
- Update the form for showing the score of each candidate by subject and ranking each candidate by score by adding information such as certificate and skill.

Inspection program:

- Create the name of inspection program user for officials and contracted staff of the NSSF branches for searching and setting the location of enterprises/establishments by using Google Map.
- Update the form for setting the location of enterprises/establishment and add the name of program user for officials and contracted staff of the NSSF branches.

Gateway (SMS Gateway) for sending SMS to the NSSF members:

- Test the SMS Gateway through mobile phone.
- Add some functions for retrieving the data of program:
 - o Benefit: for notifying the investigation result of work injury.

- Registration and contribution: for notifying the contribution payment and enterprises/establishments that have not yet paid contribution.
- Searching the information of workers through mobile phone: for sending the code.

Modem (SMS System) for receiving and replying to the NSSF agent and the health facility: create function for retrieving the data of workers in health care scheme in order to show the validity of service entitlement in the health facility through sending the message to the NSSF server.

Program for the primary investigation of work injury:

- Study workflow of the system and design interface of program.
- Create database system for storing data and creating the form for inserting health service consumption letter and form for the primary investigation of work injury.
- Adjust the form for inserting the work injury report so that the user can insert the work injury report

Developing the NSSF Data Transfer: for the Accounting Division in order to retrieve more conveniently the data of contribution and of benefit cost for health care scheme for putting them into Sage Page of the Accounting Division.

Program for checking the validity of service entitlement in the health facility through mobile phone with Android:

- Create room for storing data of program user and of workers' data retrieval.
- Design the form for searching the information of the NSSF member
- Update the form for searching the information of the NSSF member and adding data retrieval code for the NSSF member.

HSPIS program: inserting data of workers for testing in HSPIS system in order to verify the validity of health care service entitlement in the health facility for monthly contribution payment.

4.2.3.2. Network

- Resolve network problems in the NSSF branch, Banteay Meanchey province, by connecting networks together between Sereysophorn and Poipet branches in order to retrieve data of attendance management for officials and contracted staff.
- Mission to install networks additionally in the NSSF branches including Prey Veng, Svay Rieng, Odor Meanchey, Kampong Chhnang, Pursat, and Pailin provinces.

- Facilitate to monitor and resolve network problems in the central office and provincial branches.
- Design the information technology guidelines and install new network in Siem Reap branch.
- Study and connect the network from the health facility to VPN (Layer 2 + Cisco ASA 5505) of the central office.
- Connect networks additionally in the NSSF branch, Kampong Thom province.
- Prepare to install GFI program (prepare to install server machine).
- Collaborate with Ecam Company to monitor the update of temporary license of Juniper.
- Convene the meeting to prepare Data Recovery (DR).
- Collaborate with Campura Company to configure GFI and Troubleshooting Core Switch.
- Collaborate and prepare new network in the NSSF branch, Preah Vihear province.
- Collaborate with Ecam Solution Company to separate Public IP Address through each server.
- Prepare to test Configuration Switch Cisco 2960x-Series.
- Test networks between DR and health facility.
- Install network for health care scheme in the new NSSF branches.
- Configure Juniper to adjust IP Address (Web Server, Email Server, DVR, and SMS Gateway)
- Prepare the documents for installing network in the health facility recognized by NSSF.
- Install and test network in the health facility (Calmet, Preah Kossamak, and Khmer-Soviet Friendship hospitals)
- Collaborate with Online Company to connect network with ACLEDA website in order to operate normally after changing new IP Public.
- Configure and test Cisco ASA 5505 for being installed in 03 computers of the health facility and Inspection Division (located nearby Samroung Orndet pagoda)
- Configure Cisco ASA 5505 to link with 03 desk phones in Health Care Division.
- Mission to check network in the NSSF branches such as Rattanakiri, Mondulkiri, Prey Veng, and Svay Rieng provinces.
- Create new VLAN for operating Fingerprint server machine and configure 05 client machines for connecting with the Fingerprint server machine.

4.2.3.3. Maintenance

- Contact all NSSF provincial branches and some district branches for asking the operation of the NSSF program, online data transfer, and computer operation and resolve other problems.
- Resolve the error of printer and network for all divisions in the central office and provincial branches.
- Check air conditioner, temperature, electricity system in the server room and the operation of server machine every week.
- Check the antivirus server machine and scan virus in all computers of the central office.
- Collaborate with maintenance and network team in order to resolve the disconnection of Wifi router.
- Create the clip to guide how to use the system for numbering and initialing the work injury report of the Benefit Division and the system for checking the report, posting the checked report, and submitting the verified report to the Inspection and Legal Affair Division.
- Collaborate with Phone Service Company to additionally install a new standardized desk phone.
- Collaborate with Internet Online Company to test data-insert system in the provincial branch, Kampong Chhnang province.
- Contact with Phone Service System to resolve the problem of phone service (+023) due to disconnection and change the phone system network in order to deal with temporarily for using phone system in NSSF.
- Collaborate with the company to resolve GMS Display on the television in the Registration and Contribution Division.
- Collaborate with Symantec Company to resolve Symantec Client machine by not retrieving Update Definition from Symantec Server Machine.
- Upgrade Windows System from 32 bits to 64 bits for all the NSSF branches in capital/provinces.

4.2.4. Internal Audit

To promote the effectiveness of organization, the internal auditing has practiced the Fifth Activity, Internal Auditing Development, with the following three activities:

- Activity 1: Strengthen and extend the internal auditing management.
- Activity 2: Administrate the human resource of Internal Auditing Division.
- Activity 3: Strengthen the internal auditing implementation.

Meanwhile, the auditors accomplished activities 1 and 3 by auditing 20 provincial branches of the National Social Security Fund in relation to assets, operation, and expenditure

management. For this type of auditing, the auditors found some faults and provided the recommendations to each audited branches to modify and then reported to the NSSF Executive Director and followed up 09 provincial branches for the implementation of internal auditing recommendation.

4.2.5. Dispute or Complaint Settlement Committee of NSSF

Dispute or Complaint Settlement Committee of NSSF was established with the purpose of addressing the dispute or complaint involved with the enforcement of regulations and orders in social security sector between the NSSF members, employers, and NSSF. This Committee has tripartite compositions comprising representatives of NSSF, employers, and workers.

In 2016, the Dispute or Complaint Settlement Committee of NSSF convened the internal meeting for one time and deal with the dispute or complaint for two times as follows:

- Check the annual achievements 2015 and action plans 2016 of the Dispute or Complaint Settlement Committee of NSSF.
- Check the result of work injury evaluation of Mr. Yun Sambath, a worker in NAGPEACE CORP ORANTION LIMITED.
- Check the complaint against the Decision No. 11-16 NSSF/DCSC, dated 20 September 2016, of the Dispute or Complaint Settlement Committee of NSSF.

4.3. Dissemination and Occupational Risk Prevention

The dissemination is a vital task that NSSF has paid high attention to design numerous dissemination plans with the aim of publishing the achievements, preventing work injury, implementing the policy of social security schemes, and additionally strengthening the implementation and cooperation with the stakeholders including representative of workers, trade unions, health facilities, NGOs, and other relevant ministries and institutions in a bid to receive the new information of the implementation of social security scheme policy and urge them to contribute to the dissemination and worker injury prevention together. Remarkably, in 2016, the dissemination performed as follows:

- Meeting on the Annual Achievements 2015 and Action Plans 2016 of NSSF, convened in the grand meeting room of the National Social Security Fund.
- Dissemination meeting on the Annual Achievement 2015 and Action Plans 2016 of TPFWI and RTSTWP.
- Dissemination meeting on the Policy Implementation of Social Security Schemes and Provision of Occupational Risk Benefits.
- Dissemination meeting on the Implementation of Social Security Schemes on Health Care.

- Dissemination meeting on Hygiene, Work Safety, Working Conditions, Social Security Scheme Benefits, Preventive Measures on Workers’ Faintness, and Worker-Transporting Means.
- Dissemination meeting on the Dissemination of Road Traffic Safety in terms of Transportation Means to Worker-Transporting Drivers and Workers, Driving Training Course, and Driving Examination.
- Training Course for Focal-Point Trainers on Prevention of Workers’ Faintness, Traffic Law, and First-Aid.
- Dissemination of the Video Clips on Television Channels and Audio Spots on Radio Channels.

Figure 3: Dissemination Meeting on the Policy Implementation of Social Security Schemes on Health Care

- Newsletter, calendar, leaflet, booklet, and registration documents were distributed to the participants in each dissemination meeting.

Apart from the disseminations above, NSSF also possesses a website: (www.nssf.gov.kh) with all information and significant legal instruments in connection with the implementation of the Law on Social Security Schemes for Persons Defined by the Provisions of the Labour Law, Facebook Page of the National Social Security Fund, phone contact, and Hotline (1286) for disseminating the breaking news associated with the policy implementation of social security schemes and informing the members directly and immediately. In addition, NSSF has also disseminated through the media and designated the officials to directly publish, guide, and explain the workers in the enterprises/establishments in relation particularly to the policy implementation of social security schemes on Occupational Risk and Health Care, procedures and formalities of registration, contribution payment, benefit claim, and benefit provision.

4.3.1. Strengthening the Policy Dissemination of Social Security Schemes

To strengthen the policy dissemination of social security schemes, in 2016, NSSF disseminated the policy of strengthening benefit provision for workers to representatives of enterprises/establishments, the NSSF members, organizations, hospitals, local authorities, health

facilities (signed the agreement with NSSF), and all victims, participants, who have been gaining work injury benefits from NSSF.

Table 22: Policy Dissemination of the Implementation of Social Security Schemes

Policy Dissemination of the Implementatin of Social Security Schems

4.3.3. Dissemination of Work Injury Prevention

4.3.3.1. TPFWI

Team for Prevention of Faintness and Work Injury (TPFWI) has duties to study the causes of workers' faintness, take the emergency actions, facilitate with hospitals and relevant authorities in order to allow the victim to receive the emergency, and prepare the dissemination program for work injury prevention. TPFWI has been designing the meeting to disseminate gradually the working conditions, hygiene, work safety, prevention of workers' faintness and

traffic accident due to workers' transportation means, and benefits of social security schemes to the representatives of enterprises/establishments and workers in order to prevent from work injury, especially for reduction of workers' faintness at the lowest level. Noticeably, in 2016, this team prepared the dissemination meeting for 77 times joined by 77 factories with 13,042 workers (11,738 females).

Figure 4: Dissemination Activities on Hygiene, Work Safety, and Working Conditions.

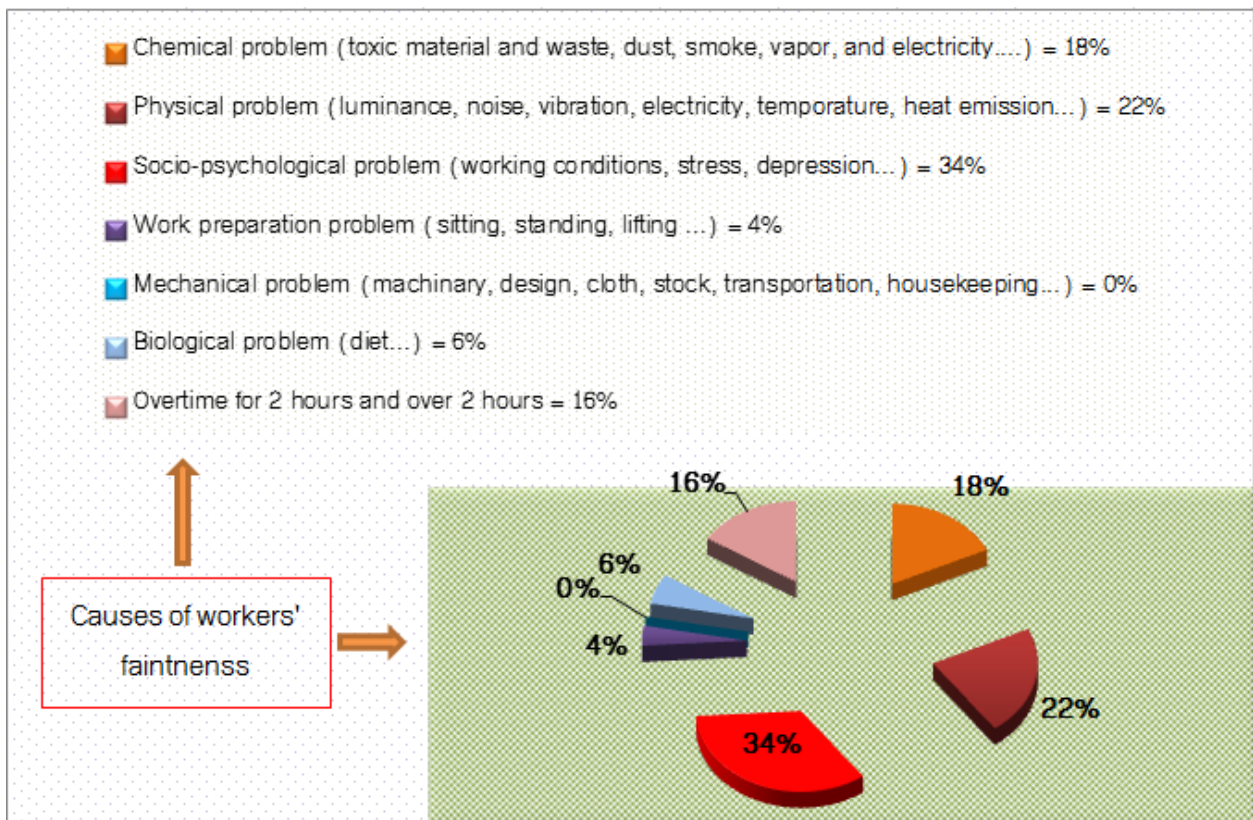

In the case of workers' faintness, TPFWI also help to facilitate to take actions on modification and emergency in 18 factories with 1,160 workers (1,159 females).

4.3.3.2. Road Traffic Safety Team for Workers' Prevention

Currently, the traffic accident is a major issue that the Royal Government has to address because the victim suffered from the traffic accident leading to death, injury, disability, and numerous loss of public and private properties, in particular the workers suffered from the commuting accident by other transportation means. For the sake of contributing to reduce and prevent from the traffic accident, the National Social Security Fund under the tutelage Ministry of Labour and Vocational Training established Road Traffic Safety Team for Workers' Prevention (RTSTWP) by the Decision No.002/13 LV/D, dated 25 January 2013, with the compositions of relevant ministries and representatives of employers, workers, and Handicap International. This team has duties to build action plans, study and collect data, conduct the statistics of workers' travelling means, disseminate traffic law and traffic safety, and collaborate with the local authorities and relevant authorities to take preventive actions on traffic accident as well as implement other duties under the order of Ministry of Labour and Vocational Training.

Figure 5: Event of Driving Examination and Distribution of the Driving Licence to the Work-Transporting Drivers

In 2016, the team designed the action plans and materials for publishing the worker-transporting drivers and workers on Traffic Law, Vehicle Inspection, First-Aid, Helmet-Wearing, and Other Preventive Measures, especially the causes resulting in the frequent traffic accident and other remarkable works as follows:

Table 28: Situation of Traffic Accident

Workers Suffered from Traffic Accident	Case	Situation of Victim (Person)					Vehicle (%)			Offending Vehicle (%)		By Sector (%)		
		Death	Serious	Mild	Total	Woman	Motorbike	Car	Other	Worker-Transportation Vehicle	Other	Factory	Bank/Micro-Finance	Other

II. Challenges of Social Security Scheme Development

1. Challenges of Strengthening and Extending the Implementation of Occupational Risk Scheme

Until 2016, the National Social Security Fund faced some challenges as follows:

1.1. Administration

Human resource is still limited.

1.2. Finance

The building of the National Social Security Fund is small (the NSSF workplace is small)

1.3. Technic

1.3.1. A Handful of Employers

- Don't know NSSF precisely involved with the procedures of registration, contribution payment, and monthly submission of incorrect number of workers.
- Difficult to appoint the owners of enterprises (restaurant, entertainment club, Karaoke etc...)
- Delay to register the workers.
- Closure, suspension, and change of address, administrator, owner, and name without notifying NSSF.
- Type of anarchic handicraft with no proper legal instruments.
- Submit the late or/and incorrect work injury report and keep the benefit claim documents until many then submit them to NSSF.
- Not yet paid contribution for the last month of 2016 amounted to 18.16%.

1.3.2. A Handful of Workers

- Don't know NSSF clearly, don't have proper identification documents, and claim the non-work injury benefit.
- Don't have legitimate marriage certificate.
- Access services in the health facility not signed the agreement with NSSF and in the wrong target.

1.3.3. A Handful of Health Facilities:

Quality of care of some health facilities is limited.

2. Challenges of the Launch of Health Care Scheme

For the implementation of Health Care Scheme, the National Social Security Fund faced some challenges as follows:

2.1. Administration

Human Resource is limited (hard to recruit medical doctors, limited knowledge/skill).

2.2. Finance

The building of the National Social Security Fund is small (the NSSF workplace is small)

2.3. Technic

2.3.1. A Handful of Employers:

- Renewing (re-identification) the registration of workers
 - ✓ Delay to register.
 - ✓ Concern the impact of production process by sending a small number of workers.
 - ✓ Afraid that ILO files a complaint and report to the buyer.
- Don't report the number of new and resigned workers
- Submit the incorrect number of workers

2.3.2. A Handful of Workers:

- Renewing the registration of workers
 - ✓ Use other's identification documents by not telling the truth because they are afraid that they will be dismissed.
 - ✓ Don't understand obviously the benefit of health care.
 - ✓ Afraid of losing their seniority when their names are adjusted properly.
- Don't show the NSSF member card when accessing services in the health facility by thinking that the general practitioner will provide the services better when they expend their out-of-pocket.

2.3.3. A Handful of Health Facilities' Service Provision

- Some general practitioners don't understand clearly the procedures of service provision for the members (transferring the patient from one ward to another) and prescribe the essential drugs inadequately.
- Promote/sell the prenatal-care products when the patients go to take a pregnancy test; and they are required to expend their out-of-pocket. So, it makes misconception about benefits of health care services.

3. Challenges of Urging to Prepare and Launch Pension Scheme

- 3.1. *Shortage of human resource.*
- 3.2. *Shortage of mathematic expert (actuary) for the calculation of contribution payment and benefit provision.*
- 3.3. *Shortage of basic data for study and analysis.*
- 3.4. *Not yet design to study the feasibility of implementation.*
- 3.5. *Small workplace.*

III. Remedies and Action Plans

With the aim of implementing the Law on Social Security Schemes for Persons Defined by the Provisions of the Labour Law with effectiveness and punctuality and addressing other challenges, the National Social Security Fund has some significant action plans as follows:

1. Strengthening and Extending the Implementation of Occupational Risk Scheme

1.1. Administration

To prepare the training courses and request the development partners for offering training courses in both local and international and developing the information technology system.

1.2. Finance

- Request the approval from the tutelary ministries for buying a plot of land and constructing the building.
- Request for leasing the building temporarily.

1.3. Technic

1.3.1. Employers of the Enterprises/Establishments

- Keep disseminating the implementation mechanism entering into force.
- Continue facilitating to appoint the employers in the afternoon and try its best to guide and explain prior to taking administrative measures on them.
- Facilitate and explain directly with the purpose of specifying the situation of whether enterprises/establishments are operating or not.
- Try to contact directly with the administrator of enterprises/establishments in order to guide how to prepare the contribution payment and benefit claim documents.
- Demand the documents directly through the constraint letter.

1.3.2. Workers

- Facilitated and explained directly the guidelines/regulations coming into force.
- Urged to apply for a marriage certificate.
- Guided to access services in the health facility signed the agreement with NSSF.

1.3.3. Service Provision of Health Facility

- Facilitate with the health facility signed the agreement to better provide services and convene the meeting to address other challenges.

- Keep signing the agreement with health facility and designating NSSF agents in the recognized health facility.

2. Implementation of Health Care Scheme

2.1. Administration

- Prepare the separate conditions/statute for medical profession .
- Conduct more training courses.

2.2. Finance

- Request the approval from the tutelary ministries for buying a plot of land and constructing the building.
- Request for leasing the building temporarily.

2.3. Technic

2.3.1. Employers of the Enterprises/Establishments

- Explain the procedures of registration and service provision.
- Guide how to prepare a report of the number of workers correctly.

2.3.2. Workers

- Explain the procedures of renewing the registration of workers (dissemination of Notification No. 127 LV/N on Registration of Workers in the National Social Security Fund).
- Explain and disseminate the health care benefits as well as facilitated the receipt of medical care services for members through the NSSF agent in the health facility.

2.3.3. Service Provision of Health Facility

- Convene the meeting in order to find the solution for providing the essential drugs and services smoothly.
- Facilitate and request the health staff not to promote/sell the medical-related product to the NSSF members.
- Keep determining the level of care and signing the agreement with health facility in 25 capital/provinces.
- Explain the provider payment methods.
- Explain the procedures of verifying the members' identification in the health facility through SMS and H-SPIS system.

3. Pensions

3.1. Recruit staff and build capacity.

3.2. Request to collaborate with ILO and development partners to prepare implementation mechanism and build capacity.

3.3. Request the development partners for the mathematic expert (actuary) to study and collect data for analyzing the contribution payment and service provision.

3.4. Design to study the feasibility of implementation, request the approval for implementation, and prepare the legal instruments.

3.5. Request the approval from the tutelary ministries for buying a plot of land and constructing the building.

CONCLUSION

According to the above-mentioned report, it highlights that NSSF has taken a step forwards by implementing Phase I, Occupational Risk Scheme, until the year of 2016, expanded the nationwide coverage, registered 8,731 enterprises/establishments with 1,136,271 workers, signed the agreement with 97 health facilities, provided the occupational risk benefits in 2016 to 19,262 victims, and inspected on many cases in the enterprises/ establishments to strengthen the law enforcement. Apart from registration, contribution collection, benefit provision, and inspection, NSSF has been renewing (re-identification) the registration of workers, preparing preventive measures on work injury, and designing to strengthen, extend, and develop the policy implementation of social security schemes numerously with a view to ensuring to provide social security services with effectiveness and punctuality. In this spirit, NSSF has just launched Phase II, Health Care Scheme, in a bid to enable the workers to have entitlement to receive medical care services, health prevention, and disability benefits when bearing illness, maternity, and other contingencies. Among the total number of 600,831 members, 16,063 victims accessed services for Health Care Scheme in the health facility. Currently, there are 783 health facilities signed the agreement.

For the above-mentioned achievements, it is because the leaders, officials, and contracted staff of NSSF have strived to fulfill the works with professional conscience and high responsibility. Furthermore, there are support from ministries, institutions, national and international organizations, and other development partners and the good participation in law implementation of employers and workers.

In line with the above achievements, NSSF has observed that there are some challenges relating to the compulsory implementations including a handful of employers and workers did not comply well, quality of medical care service provision was limited, and other problems belong to NSSF side. In connection with these challenges, NSSF also noticed that the number of work injuries have still increased in line with the growth of enterprises/establishments and workers registered in NSSF, especially for the case of serious injury, although the commuting accident accumulated slightly, this case is still a challenge. Therefore, in order to contribute to address the challenges above, it is required to continue to support and collaborate additionally with ministries and institutions involved, national and international organizations, and other development partners for developing the social security sector in Cambodia and participate actively in taking actions to

Unofficial Translation by NSSF Translation Team

disseminate in a bid to reduce work injury at the lowest level. It is a part to contribute to reduce the poverty and promote the social stability. Moreover, the workers themselves have to make an awareness of health problems and high precaution for fulfilling the works, particularly for the commute, with the purpose of avoiding the traffic accident because it will lead to the loss of job, time, money, and other contingencies resulting in death.

Phnom Penh, 30 December 2016

25	Unclear-Symptom Wound	349	14	335
26	Multi-Physical Wound	2,964	1,134	1,830
27	Whole-Physical Wound	67	18	49
28	Other Wounds	12,513	1,277	11,236
Total		34,513	8,830	25,683

5. Classification of Work Injury by Types of Means in Economic Activity

No.	Type of Consumption Means	Number of Victim		
		Total	Man	Woman
1 - Machine				
1	Trailers except Electricity-Powered Machines	17	1	16
2	Converting Machine	1	1	-
3	Metal-Manufacturing Machine	22	16	6
4	Generator	31	30	1
5	Wood-Manufacturing Machine	26	15	11
6	Plastic-Manufacturing Machine	3	2	1
7	Mixing Machine	3	3	-
8	Agricultural Machine	4	2	2
9	Mine-Extracting Machine	1	-	1
10	Sewing machine	5,947	277	5,670
11	Stitch Sewing Machine	169	6	163
12	Cutting Machine	577	231	346
13	Ironing Machine	240	48	192
14	Button-Putting Machine	495	142	353
15	Embroiding Machine	165	29	136
16	Washing Machine	27	23	4
17	Drying Machine /Dryer	5	4	1
18	Other Machines	2,163	555	1,608
2 - Transportation and Lifting Machine				
1	Lifting Tool and Machine	17	15	2
2	Rail Transport	2	2	-
3	Land Transport excluding Rail	-	-	-
4	Air Transport	-	-	-
5	Water Transport	1	-	1
6	Other Transports	136	66	70
3 - Materials				
1	High-Pressure Tool	-	-	-
2	Heating Furnace	13	13	-
3	Blast Furnace	-	-	-
4	Microwave	3	3	-
5	Brick Furnace	4	4	-
6	Freezing Factory	2	1	1
7	Electrical Aesthetics	-	-	-
8	Electrical Motor	63	59	4
9	Electrical Equipment	4	4	-
10	Other Materials and Equipment	266	97	169
11	Stair and Mobile Ramp	16	11	5
12	Scaffolds	5	5	-
13	Other Equipment	83	39	44
4 - Equipment, Substance, and Radioactive Substance				
1	Chemical Substances excluding Explosive and Toxin	-	-	-

2	Toxic Substances	5	3	2
3	Pieces Splattered	13	4	9
4	Radioactive Substance	2	1	1
5	Explosive Substance	8	3	5
6	Liquid	11	6	5
7	Dust	20	14	6
8	Other Materials and Substances	-	-	-
9	Gas	36	15	21
5 - Workplace Atmosphere				
1	Underground	51	41	10
2	Transportation	468	120	348
3	Outdoor Building	-	-	-
4	Indoor Building	26	13	13
6 - Other Means				
1	Animal	4	2	2
2	Other Non-Classified Utilization Methods	13,150	3,252	9,898
7 - Transportation				
1	Pedestrian	1,230	290	940
2	Motorcycle	6,837	3,090	3,747
3	Trishaw	185	31	154
4	Car	1,814	222	1,592
5	Bikecycle	142	19	123
Total		34,513	8,830	25,683

6. Classification of Work Injury by Workplace and Sex

No.	Workplace Atmosphere	Number of Victims		
		Total	Man	Woman
1	Outdoor building	994	661	333
2	Indoor building	23,838	4,757	19,081
3	Underground	22	12	10
4	Transportation	9,659	3,400	6,259
Total		34,513	8,830	25,683
